

## **Bob Schlue**

### **Director of Missions Operations Colorado Boeing Company**

After completing his undergraduate education at Washington University in St. Louis, MO, where he obtained a bachelor of science in electrical engineering and a bachelor of science in physics, Bob started at McDonnell Douglas in June of 1976. He held variety of engineering and management positions in the area of avionics integration with an emphasis in Electronic Warfare (EW).

In 1991, he joined Phantom Works in a variety of proprietary programs where he further expanded his expertise in avionics systems including sensors and lethality concepts. Bob was involved in a number of major program pursuits and help to innovative new business approaches to

avionics development based on open systems architecture concepts. After serving as deputy manager of Avionics Integrated Product Team on the Boeing JSF One Team, Bob accepted a position in Missile Defense as the Chief Engineer for the Colorado Springs site.

In 2004, Bob joined the Ground-based Mid-course Defense (GMD) program in Huntsville, AL, in a variety of positions including flight test mission manager for the successful intercept mission in September 2006. In 2006, Bob was named Director – Integrated System Development and Verification within the GMD Systems Engineering & Integration organization. He held several key positions within Systems Engineering including Technical Director – Weapon Systems Engineering and Director – Systems Analysis. In May 2010 Bob was named Director – Sensors System IPT.

Bob has recently returned to Colorado as the Director of Mission Operations Colorado and runs the Boeing operations in Aurora, CO.

Bob is married to Christi and they have three children, Stephanie, Katrina, and Erik and three grandchildren, Ashlin, Elizabeth and Lela.
